You can quickly and automatically **apply** payments against specific invoices or manually **apply** partial payments on an individual-item basis against a specific invoice.

ORDER ENTRY/INVOICING

The well-designed O/E and **Invoicing** module can be integrated with Inventory Control. If you are in a service industry, you may not even need the Inventory Control module, since O/E supports **invoicing** and debit/credit memos for sales returns, adjustments, and exchanges.

Invoices can have an unlimited **number of line items**, and **taxes** and G/L accounts can be specified for each item. But discounts cannot be automatically applied on a **line-item** basis, and the system falls short if your customers require that you reference their **purchase orders** on this basis.

During data entry, defaults are filled in from the customer record. Credit balances and customer statistical information are updated when the **invoice** is printed.

...of the goods somehow.

"Why not use this authority to receive selected information from

commercial invoices?" asked Menendez, president of Sack & Menendez, a Tampa-based customs broker.

Menendez said most invoice information already is contained within entries under Customs' Automated Broker Interface program.

"Brokers could add some data elements to these records to create what amounts to an electronic invoice on a line-item basis," he said.

EEEP builds on Customs Form 7501, the standard U.S. Customs entry form, and adds only the invoice details required under the law.

For electronic invoices, brokers must include shipment information, such as name and address of seller, commercial invoice number, item or part number, commercial description, entered value, country of origin, ruling number, weights and quantity. All new data is placed in existing Automated Broker Interface records, including visa, category, license, duty, tax and fee information.

Brokers' ability to transmit EEEP invoices is indicated in their systems by...

The announcement constitutes the only solicitation; proposals are being requested and a written solicitation will not be issued. Solicitation Number N00164-03-Q-0007 is hereby issued as a request for proposals (RFQ). Incorporated provisions and clauses are those in effect through Federal Acquisition Circular 2002-07 as well as DCN 20020531. The North American Industry Classification System (NAICS) Code for this procurement is 332992 and the size standard is 500 employees. This requirement is for the following: CLIN 0001 - A minimum quantity of 1 (one)/maximum quantity of 4 (four) Enhanced Grenade Launcher Modules

(EGLM) prototypes. These limited numbers of EGLM prototypes sought in this combined synopsis/solicitation will be utilized as aids at briefings, exhibits, live-fire demonstrations, and other activities to enhance public and government understanding of the EGLM Project (SOL N00164-01-R-0103). The EGLM samples sought in this announcement are to be functional prototypes (or production samples) that are capable of conducting the following tasks: (1) SAFETY: to be safely fired by unprotected personnel using standard 40mm munitions, (2) ACCURACY: First round (Objective, (O)), second round (Threshold, (T)) shall land within a 5-meter radius of a point target at unknown ranges out to 400 meters, under low wind conditions (less than 5 mph). (3) LIGHT CONDITIONS: Operate in daylight (T), darkness (O) (can be in conjunction with a government-furnished Night Vision Goggles), (4) RANGEFINDING: Capable of ranging a target (E-type silhouette) out to 500 meters (T), 1000 meters (O). (5) MOUNTING TO CARBINE: Able to quickly (not more than 5 minutes) mount on an M4A1 Carbine. (6) INDEPENDENT OPERATION: Able to be removed from the M4A1 Carbine and attached to a stock and/or grip that allow the EGLM to be fired in a stand-alone mode quickly (not more than 5 minutes). (7) STERILITY: Has no visible manufacturers markings or logos. This simplified seven-point performance specification is for this announcement only, and is not to be confused with the full performance specification for the EGLM Project (SOL N00164-01-R-0103). Simplified Acquisition Procedures will not be utilized. Delivery is required to begin within 60 days after contract award, and shall be FOB destination, NAVSURFWARCEMDIV Crane, inspection and acceptance will also be at destination. The government may select and accept one or more proposals for award; more than one award may result from this announcement. Selection for award will be based on past performance and price. Offers that exceed \$24,999 per item will be rejected as unreasonably expensive. Offers that are non-compliant with any material requirement of this solicitation may be rejected without further consideration for award. The Government intends to exhibit these EGLM samples, to include their method of operation; Intellectual Property protection is the responsibility of the vendor. The contractor shall extend to the Government the full coverage of commercial sale warranty provided such warranty is available at no additional cost to the Government. Clauses/provisions: 52.203-3; 52.211-14 (DO); 52.211-15; 52.212-1; 52.212-3 Alt I (FILL-IN); (NOTE: paragraph (b) of 52.212-3 is not applicable); NOTE: This provision MUST be filled out completely and submitted with the offer. 52.212-4; 52.212-5; (incorporating 52.219-4; 52.219-8; 52.222-21; 52.222-26; 52.222-35; 52.222-36; 52.222-37; 52.225-13; 52.232-33) 52.215-05 (fax proposals to 812-854-5095); 52.216.18 (. . . orders may be issued from date of contract through 3 years after date of contract.); 52.216-19 ((a) Minimum order, 1 EGLM; (b)(1) Maximum order, 4 EGLM; (b)(2) 4 EGLM; (b)(3) 60 days); 52.216-22 (. . . The following clauses shall also be incorporated into this combined synopsis/solicitation: PHYSICAL SECURITY OF CONTRACTOR'S FACILITIES (6004) -- The contractor agrees to maintain his facilities in accordance with the applicable requirements of Department of Defense Instruction 4145.26M as referenced in DFAR 252.223-7002. Supplies procured under this contract are identified as sensitive material (**Category IV**) under DOD 5100.76-M (Physical Security of Sensitive Conventional Arms, Ammunition and Explosives at contractor facilities), requiring physical security and transportation in accordance with DOD 5100.76-M. The offeror shall provide its Commercial and Government Entity (CAGE) **Code**, Contractor Establishment **Code** and Tax Identification **Number**. The Contractor shall include, as a minimum, the following information on each **invoice**: (1) Name and address of the Contractor; (2) **Invoice number** and date and shall be marked "Original **Invoice**"; (3) Contract **number**, contract **line item number** and, if applicable, the order number; (4) Description, quantity, unit of measure, unit price and extended price of the items delivered or services performed and an invoice total; (5) Shipping number and date of shipment including the bill of lading number and weight of shipment if shipped on Government bill of lading; (6) Terms of any prompt payment discount offered; (7) Name and address of official to whom payment is to be sent; and (8) Name, title, and phone number of person to be notified in event of defective invoice. Invoices will be handled in accordance with the Prompt Payment Act (31 U.S.C. 3903) and Office of Management and Budget (OMB) Circular A-125, Prompt Payment. Contractors are encouraged to assign an identification number to each invoice. MAIL

INVOICES TO: Vendor Pay, Code 0562, Bldg 2701, NAVSURFWARCENDIV, 300 Highway 361, Crane IN 47522-5002. PAYMENT STATUS INQUIRIES--Status of invoice payments can be obtained from the following web site: www.dfas.mil/money/vendor <<http://www.dfas.mil/money/vendor>> If the payment is being made by DFAS-Columbus use the MOCAS Vendor Pay Inquiry System (VPIS) site listed on the above web site. It is recommended that the vendor download the "MOCAS VPIS Help Guide" and "Reason and Remark Code Document". You must then register by clicking on "User Registration" under the subheading "MOCAS Vendor Pay Inquiry System" before payment inquiries can be made. If payment is being made by other than DFAS-Columbus, status of invoice payment can be obtained through the Non-MOCAS System by cage code, contract number or DUNS number at the above listed web site. To determine which system to use see the following blocks of your contract document for payment offices designation: SF 26-Award/ Contract-Blk 12; SF 33 Award/Contract-Blk 25; SF 1449 Solicitation/Contract/Order for Commercial Items-Blk 18a; DD1155 Order for Supplies or Services-Blk 15.

Additional Marking Instructions -In addition to any other marking instructions in this order, it is essential that all packages be accompanied by packing slips (preferably a DD 250) and all packing slips be located on the outside of the box or container and that all packages, shipping papers, and invoices be marked with the following information to permit effective receipt processing and timely payment: 1) Order Number; 2) Contract Line Item Numbers. The foregoing requirements must be passed on to any organization entity originating a shipment as a deliverable under this order. Caution: Any packages received which are not marked in accordance with the above requirements may be refused and returned to the contractor at the contractor's expense.

BUSINESS HOURS--Crane Division, Naval Surface Warfare Center, Crane, Indiana, allows flexible working hours for its employees. The normal eight-hour shift may be worked between the hours of 6:30 AM and 5:30 PM EST. Many of our employees work 6:30 AM to 3:00 PM as a regular practice. The core time, when all employees are scheduled to work, is 9:00 AM to 3:00 PM.

EXPEDITING CONTRACT CLOSEOUT (NAVSEA) (DEC 1995)--(a) As part of the negotiated fixed price or total estimated amount of this contract, both the Government and the Contractor have agreed to waive any entitlement that otherwise might accrue to either party in any residual dollar amount of \$500 or less at the time of final contract closeout. The term "residual dollar amount" shall include all money that would otherwise be owed to either party at the end of the contract except that, amounts connected in any way with taxation, allegations of fraud and/or antitrust violations shall be excluded. For purposes of determining residual dollar amounts, offsets of money owed by one party against money that would otherwise be paid by that party may be considered to the extent permitted by law. (b) This agreement to waive entitlement to residual dollar amounts has been considered by both parties. It is agreed that the administrative costs for either party associated with collected such small dollar amounts could exceed the amount to be recovered.

PREPARATION FOR DELIVERY (STANDARD COMMERCIAL) Standard commercial preservation, packaging and packing is authorized unless otherwise specified.

MOST FAVORED CUSTOMER ASSURANCE-The contractor agrees that the prices for the supplies or services furnished under this contract are as low or lower than those charged the supplier's most favored customer for comparable quantities under similar terms and conditions, in addition to any discounts for prompt payment.

TAX EXEMPTION-Section 39(a) and Section 6 of the Indiana gross income tax act of 1933, specifically exempts Crane Division, Naval Surface Warfare Center, Crane, Indiana, as a government activity from any payment of sales and use tax.

Specification: ...payment cycle that are of significance to a business. They are: purchase information, purchase reference **number**, payment **number** and payment information. Each will be described below. 1) Purchase Information (user defined information)

The purchase information is user defined and is the specific **line item** detail of a purchase. It contains information

about: quantity; description; product **codes**; price; **tax**; and a general ledger cost **code** or **codes** to which the goods are allocated. Typically this is the information that is contained in the **purchase order** a company provides to its supplier.

Whether the business is using an electronic purchase system or hand written purchase orders, every business needs to **match** the goods ordered and received with the suppliers invoice and payment to the supplier within... ..2 data include Level 1 data plus: sales tax; and variable data field (typically a **purchase order number**).

Suppliers who are Level 2 capable have the ability to pass sales **tax** information as well as a unique transaction data field (typically limited to 16 characters) through the purchasing card system. Some issuers pass this data to the cardholder **statement** but it is not mandatory for merchants to use this variable field.

Level 3 Data: **Line Item Detail**

Transactions that include Level 3 data include Level 1 and Level 2 data plus: item product **code**; item description; item quantity; item unit of measure; and item price; item **tax** treatment (e.g. 17.5%).

III. Limitations of Current Card Product Functionality

Supporters said Fla. bill could serve as national model for other states that wanted to reform outdated telecom taxation.

Measure would combine state telecom sales and gross receipts taxes into single statewide 9.17% rate that would be billed as one line item. Local utility tax, telecom franchise tax, cable franchise tax and sales tax would be consolidated into single local rate for that municipality and billed as second line item. Local rates would range from 1.6% to 5.1%, depending on tax types and rate locality currently levied. State taxes on direct broadcast satellite services would be wrapped into single 13.7% rate listed as single line item on satellite

services bill, with about 1/3 of collections from DBS tax to be returned to local govts. Rates were set to be revenue neutral for state ...affect state relay service tax or local E- 911 taxes, which will continue to be collected separately. ...related charges, other information is received from the vendor 140 and placed on the final bill to provide additional information about the usage, including, for example, meter number, last reading, current reading, start and end dates. The bill calculation module 146 converts the usage data into a rated bill, including any tax due on the sale. The retail company 234 also provides the financial institution 100 the required information to properly calculate the tax due on each sale. In the process for calculating the bill, initially, the incoming data is validated. Validating the data includes, receiving line items via a flat file from each supply chain vendor 140 or its meter reading vendor, validating the formatting of each line item, and returning any line items that do not match the mutually agreed upon format

Each line item also includes the dollar amount and any descriptive text relating to the line item. The retail company's bill aggregator 124 also validates the formatting of each line item and returns any line items that do not match the mutually agreed upon format. A component that has multiple charges (i.e., tax, shipping) creates multiple line items, one for each charge...

The supply chain vendor's component number is validated to match one of the components purchased by the customer 110 in the particular order. If they do not match, the record is placed in dispute for later review. The price received from the supply chain vendor 140 is validated (i.e., the line with the billing code corresponds to the item being purchased) to match the price within the retail company's component database. Non-energy charges received must match the retail company's component price. If not, the line item is rejected and returned. All of the retail company's pricing except bundle discounts must be synchronized with the supply chain vendor's price for the component. Non-energy rated bills received include taxation calculations from the supply chain vendor 140...

...financial information. For example, the government currently does not obtain information necessary to identify tax **collections** by every type of **tax** at the time of **collection**. As a result, the government cannot separately report revenue for three of the four largest revenue sources--Social Security, Hospital Insurance, and individual income **taxes**. Because of this, the government had to report these three **tax** types in the same **line item** on the Consolidated **Statement of Changes in Net Position**. Additionally, excise **tax** revenues are distributed to the relevant trust funds based 'on' assessments rather than, as required by the Internal Revenue **Code**, on **collections**. Serious weaknesses also affect the federal government's ability to effectively manage its **taxes** receivable and other unpaid assessments.⁵ The lack of appropriate subsidiary systems to track the status of taxpayer accounts affects the government's ability to make informed decisions about **collection** efforts. This weakness, for example, has resulted in the government pursuing and **collecting**, from individual taxpayers, taxes that had already been paid. Additionally, the federal government is vulnerable...

197

197
The general anti-fraud provisions would of course apply to free writing prospectuses...issuer information could be made public through the prospectus filed as part of a registration statement, the issuer's filing

obligation for free writing prospectuses, or, in the case of reporting...

...a registered securities offering that is of the type excluded from the Regulation:

A registration **statement** filed under the Securities Act, including a prospectus contained therein;

A free writing prospectus used after filing of the registration **statement** for the offering and satisfying the requirements of proposed Rule 433, or to a communication...

...An oral communication made in connection with the registered offering after filing of the registration **statement** for the offering under the Securities Act.

The proposals also would narrow the types of...ability of dealers to publish research on non-reporting issuers following effectiveness of the registration **statement**. Are there reasons to discourage publication of research by non-participating dealers in the aftermarket...of material facts or omissions of material facts required to be included in a registration **statement**

or necessary to make the statements in the registration **statement** not

misleading at the time the registration **statement** became effective. Under Section 12(a)(2), sellers have liability to purchasers for offers or sales by means of a prospectus or oral communication that includes an untrue **statement** of material fact or omits to state a material fact

that makes the statements made to obtain money or property by means of any untrue **statement** of a material fact or any omission to state a material fact necessary in order...

...of the circumstances under which they were made, not misleading.

239

238

Whether any particular **statement** or omission is material will depend on the particular facts and circumstances. Information is material...

...followed the Radiation Dynamics decision). Also, as indicated in note 244, below, the Uniform Commercial Code no longer requires that a securities contract be in writing.

241

For example, in a...

...supplement not later than the second business day after a takedown from a shelf registration statement.

We interpret Section 12(a)(2) and Section 17(a)(2) as reflecting a core...

...those sections based on statements made in offers.

244

Article 8 of the Uniform Commercial Code was amended in 1994 to eliminate the requirement that a contract for the purchase ...not affect that determination.

246

Such information could include information in the issuer's registration statement and prospectuses for the offering in question, the issuer's Exchange Act reports incorporated by...

...Section 17(a)(2) for the statements to which the section applies, are that the statement cannot contain any misstatement of a material fact or omit to state a material fact...

Under our interpretation, the liability determination as to an oral communication, prospectus, or statement, as the case may be, would not take into account information conveyed only after the...

250

These would include a prospectus or oral **statement** in the case of Section 12(a)(2), or a **statement** to which Section 17(a)(2) is applicable.

251

Or, in the case of Section...
...contained in a prospectus supplement or Exchange Act filing incorporated by reference into a registration **statement** may modify or supersede other previously disclosed information that was contained in a document incorporated or deemed to be incorporated by reference in that registration **statement**.

We are proposing to revise Rule 412 to make it consistent with our other proposals...

...contract of

253

The date and time that the information is deemed part of

the registration **statement** preserves an investor's rights under Section 11, but does not affect any rights assessed...

...might enforce under Section 17(a). Thus, information that is deemed part of the registration **statement** as of the time of the contract of sale for shelf takedowns or as of...

...of the contract of sale that is not in or deemed part of the registration **statement** at the time of the effectiveness of the registration **statement** for the securities sold to the investor.

253

Whether the time of sale occurs on the same date as the effective date of a registration **statement** would depend on the type of registered offering the issuer is undertaking. For example, for...

...to be registered on a delayed basis under Rule 415, the prospectus in the registration **statement** must contain all required information, other than that permitted to be omitted pursuant to Rule 430A. For these non-shelf offerings, the effective date of the registration **statement** would be on or before the sale date, but the registration **statement** at the effective date would be deemed, as today, to contain information that was not actually contained in the prospectus or registration **statement** at the date of effectiveness, but is included in the filed final prospectus under Rule...

...our proposed amendment regarding the treatment of prospectus supplements, the effective date of the registration **statement** for liability purposes would be the earlier of the date of first use of certain...

262

Under proposed Rule 430B, a base prospectus in a shelf registration **statement** could continue to omit information that is unknown or not reasonably available to the registrant...

...as provided in the Rule would be a permitted prospectus.

264

Thus, after a registration **statement** is filed, offering participants could use a base prospectus that omitted information in accordance with...described below, through its Exchange Act filings that were incorporated by reference into the registration **statement** and prospectus, and identified on the cover page of a prospectus supplement. Currently, information included...

267

266

See Securities Act Section 5(b) (2).

267

In the 1998 proposals, we...

Item 507 of Regulation S-K [17 CFR 229.507].

The resale registration **statement** identified the specific private transaction or transactions pursuant to which the securities

were sold; and

The private transaction was completed and the securities that were the subject of the registration **statement** were issued in the

private transaction and outstanding prior to initial filing of the resale registration **statement**.

We believe that it is important for issuers to be able to satisfy their contractual...

...security holders and the securities to be sold by them are identified in the registration **statement**. The purpose of the proposed changes is to provide a more convenient method to identify...

...these selling security holders under the federal securities laws.

The proposals would require the registration **statement** to specify the particular private transaction in which the securities covered by the registration **statement**, on behalf of the to-be-named selling security holders, were acquired. The securities covered by the registration **statement** would have to be issued and outstanding and the private offering in which the securities were sold completed under Securities Act Rule 152

272
before the resale registration **statement** could be filed. Our proposed changes could not be used to offer or sell securities...

...the resale of these securities, but must identify the selling security holders in the registration **statement** prior to effectiveness. In this case, the issuer would know the identities of the selling...

...from the issuer and would therefore be required to identify them in the resale registration **statement** prior to filing.

...Will the conditions allowing the inclusion of the selling security holder information after the registration **statement** is effective enable issuers to satisfy their contractual obligations to the selling security holders?

Are...

ii. Information Deemed Part of Registration **Statement**

We are proposing provisions in Rule 430B that will make clear that information contained in...

...filed in connection with a takedown or otherwise, will be deemed part of the registration **statement** containing the base prospectus to which the prospectus supplement relates. We also are proposing a...
...the filing of those prospectus supplements would not trigger new effective dates of the registration **statement**.

iii. Date of Inclusion of Prospectus Supplements in Registration Statements and New Effective Dates of...

...Rule 430C would deem information contained in prospectus supplements to be included in the registration **statement** as follows:

For a prospectus supplement filed other than in connection with a takedown (pursuant...

...These new provisions would determine when a prospectus supplement is deemed part of the registration **statement** for Securities Act Section 11 purposes. They would not affect the determination of when information...

...first use as the appropriate date for it to be deemed part of the registration **statement** because that is the date on which the prospectus supplement updates the information in the registration **statement**.

278

Second, a prospectus supplement filed in connection with a takedown would be part of the registration **statement** the earlier of when it is first used or, to provide that the date for...

...information may change between the date the prospectus supplement is deemed part of the registration **statement** and the time of the contract of sale (if later) of securities to a purchaser...

...sale of the securities, there were material misstatements or materials omissions such that the registration statement was misleading.

Proposed Rule 430B also would establish a new effective date for a shelf registration statement for liability purposes for a takedown or takedowns.

280

That new effective date would be...

...filed in connection with the takedown or takedowns was deemed part of the relevant registration statement. The new effective date would not, however, be considered the filing of a new registration statement for purposes of Form eligibility.

281

Such determination would remain, as today, to be made at the time of the Section 10(a)(3) update to the registration statement. As proposed, the new effective date would be for liability purposes only, would not, by...

...filing of additional consents of experts, and would not constitute an updating of the registration statement and prospectus for purposes of Securities Act Section 10(a)(3).

282

For example, a...

280

We are also proposing to amend Rule 158 to include conforming changes to the...

Thus, the rights of an investor in a prior sale (with a previous effective date...

We believe that the Securities Act contemplates that as a general matter, the date of effectiveness of a registration statement for an offering and the date on which an underwriter becomes an underwriter would be...

285

The two-year requirement was designed to ensure that the issuer had...

...could only be used for three years after the initial effective date of the registration statement.

287

Under this proposal, new shelf registration statements would have to be filed every three years, with unsold securities and unused fees carried forward to the new registration statement.

288

Continuous offerings begun prior to the end of the three years could continue on the old registration statement

until the effective date of the new registration statement, at which point the continuous offerings could continue on the new registration statement. We believe that, especially with our liberalization of procedures for shelf registration, particularly automatic shelf...

Rule 415(a)(1)(x)

We are proposing to amend Securities Act Rule...

...conforming revisions to the issuer undertakings that are required in connection with a shelf registration **statement**. These revisions would reflect the issuer's agreement regarding the inclusion of information contained in prospectus supplements in registration statements and new effective dates of the registration **statement**.

(A) Treatment of Information in Prospectus Supplements

Item 512(a) of Regulation S-K currently requires an issuer to undertake to file a post-effective amendment to a registration **statement** to:

Include in the registration **statement** any prospectus required by Securities Act Section 10(a)(3);

Reflect in a prospectus included in the registration **statement** any facts or events arising after the effective date of the registration **statement** (or the most recent post-effective amendment thereto) which, individually or in the aggregate, represent a fundamental change in the information set forth in the registration **statement**; and

Include in a prospectus included in the registration **statement** any material information with respect to the plan of distribution not previously disclosed in the registration **statement** or

any material change in such information in the registration statement.

297

297

In addition, Item 512(a)(4) contains a provision under which foreign private incorporated by reference into the registration statement. We are proposing to revise the Item 512(a) undertaking to clarify that for shelf...

This would permit an issuer to use an incorporated...

...that consent may be filed by post-effective amendment to Part II of the registration statement only or by filing of an Exchange Act report, such as an annual report on...

...report on Form 8-K or Form 6-K, incorporated by reference into the registration statement.

299

298

For automatic shelf registration statements, this provision would not apply. See discussion in...

...in addition to those permitted today? If so, are there other disclosure and other registration statement requirements that should similarly be permitted to be satisfied through the incorporation by reference of...

...we modify it to continue to require financial statements to be included in a registration statement within the required time?

...of securities and eligible majority-owned subsidiaries as additional registrants after an automatic shelf registration **statement** is effective. They would also be able to freely accommodate both primary and secondary offerings...

...delay or other obstacles imposed by the registration process.

Issuers using an automatic shelf registration **statement** would be permitted to pay filing fees in advance or on a ``pay-as-you-go'' basis at the time of each takedown off the shelf registration **statement** in an amount calculated for that takedown. The proposals would permit more information to be excluded from the base prospectus in an automatic shelf registration **statement** than from a regular shelf registration **statement**. The omitted information would then be included at or before the time of filing a...

b. Automatic Shelf Registration Mechanics

309

If an issuer were no longer eligible to use an automatic shelf registration **statement** at the time of its Section 10(a)(3) update, it would have to either post-effectively amend its registration **statement** onto the form it was then eligible to use or file a new registration **statement** on such a form. ...issuers are followed by analysts and investors in the market.

ii. Information in a Registration **Statement**

(A) Information That May Be Omitted From the Base Prospectus

Our proposals would allow automatic shelf issuers to omit more information from the base prospectus in an automatic shelf registration **statement** than is the case currently or than would be the case in a regular shelf offering registration **statement**. A base prospectus included in an automatic shelf registration **statement** could, as today, omit information pursuant to Securities Act Rule 409

313

that was unknown...

...to broaden the means by which issuers may include information in an automatic shelf registration **statement** would benefit both issuers and investors. Our proposals would provide issuers with automatic shelf registration...

...to a prospectus generally by means other than a post-effective amendment to the registration **statement**.

316

As we discuss above, we [[Page 67434]] are proposing to amend Forms S-3...

...x) and thus must be separately registered or designated prior to effectiveness of the registration **statement**. Issuers cannot currently offer and sell securities of selling security holders using an unallocated shelf registration **statement**.

We propose to remove the current restriction that would prevent well-known seasoned issuers from adding classes of securities to an automatic shelf registration **statement** after effectiveness.

323

Under the proposals, a well-known seasoned issuer could add new classes of securities or securities of an eligible subsidiary to an automatic shelf registration **statement** at any time before the sale of those securities. In order to add new classes...

...of

securities of the new class of security.

324

This requirement would make the registration **statement** cover each new class of securities to be offered. An issuer could provide the disclosure...

...in, or in an Exchange

Act report that was incorporated by reference into the registration **statement**.

325

323

See proposed amendments to Securities Act Rule 413.

324

If an issuer using...

...effectiveness to add a class of debt securities or guarantees of securities to its registration **statement**, in addition to filing a post-effective amendment to the registration **statement** to register the class of debt securities or guarantees, it also would need to qualify...

...the position that the indenture covering the securities to be sold pursuant to a registration **statement** must be qualified when that registration **statement** becomes effective and not at the time of any post-effective amendment to that registration **statement**. ...issuer must register an offering of additional securities through the use of a separate registration **statement**. In the automatic shelf registration process we propose today, however, an issuer would be permitted to add securities to a shelf registration **statement** by means of a post-effective amendment. As such, unlike in the existing registration **statement** process, the effectiveness of an automatic shelf registration post-effective amendment that adds securities to a shelf registration **statement** would be the time when registration becomes effective as to such securit(ies), as that...

...satisfied in the following manner: (1) For debt securities or guarantees included in the registration **statement** at original effectiveness, the trust indenture would be required to be included in the registration **statement** at the time that registration **statement** became effective; and (2) for debt securities or guarantees added to the registration **statement** through a post-effective amendment, the trust indenture would be required to be included in the registration **statement** at the time that post-effective amendment became effective.

325

This disclosure would become part of the registration **statement** regardless of the method chosen to provide it.

(D) Pay-as-You-Go Registration Fees...

...would pay a small initial filing fee at the time of filing the initial registration **statement**.

326

The triggering event for a required fee payment under our proposals would be a takedown off a shelf registration **statement**

For each takedown, the issuer could file a prospectus supplement for the takedown that would...

...be applied against the fees payable in connection with the first takedown off the registration **statement**.

Because an issuer also would have the ability to pay any filing fee in advance...

...Securities Act Section 5, any securities offered and sold off an effective automatic shelf registration **statement** would be deemed to satisfy the requirements of Securities Act Section 5(c) if the registration **statement**, or any amendment thereto, included that class of securities prior to the offer and sale. If the class of securities was included on the registration **statement**, the amendment, incorporated Exchange Act document or prospectus supplement reflecting the transaction and the fee...

Our proposals provide, however, that, so long as eligibility for automatic shelf registration is maintained, the new registration **statement** would be effective immediately and would carry forward the securities registered and any fee paid on the old registration **statement**.
